Introduction

Caregivers provide support to those in need, but their jobs often come with inherent risks. One of the ways to improve trust and safety of caregivers is empowering caregivers with safety tools.

Empowering caregivers with safety tools is a critical component of building trust and protecting their wellbeing. Caregivers should be familiar with procedures for reporting and responding to safety concerns.

They encounter the safety concerns like incidents of violence, threats in any situation that make them feel unsafe. Clear channels for reporting such concerns and ensuring reports need to be taken seriously and addressed promptly. This will enhance the quality of care they provide.

Caregiver current scenario

Caregivers have been giving their services in various locations across the globe. Lately, researchers have been trying to track the current situation of the caregivers. There has been a major outcry from the associated social community that caregivers are being victims of mental depression due to various factors like physical abuse, improper working conditions, mental trauma, and heavy workload.

Caregiver's Need for solution

Researchers are looking for a solution to address the global outcry of caregivers. Researchers want to address the situation by providing the best effective solution. The solution will provide a mechanism for the caregivers to express their mental state and receive proper solutions to help them come out of the situation.

Proposed Solution

By understanding the client problem and the scale of the situation, in the first phase of software development we have proposed the solution by means of the technology acting as the medium for caregivers to report their concerns.

We provide the following technical solution that covers different situations of the caregiver.

1. **Web Portal Information System for recording of caregivers information, challenges faced by caregivers, analytics.**

1. Web Portal

Taking consideration to acknowledge and work on the vast field of mental health issues among the caregivers, who are working across the globe, a full featured **Information System** has been proposed.

The Information System will be an online portal system which will be accessed by the caregiver, social parties, social workers, security parties, health professionals, doctors and researchers for various purposes ranging from recording the caregiver issue in detail to providing mental health related guideline and eventually using the information base for knowledgebase creation .

The Online based information system will provide the following modules

1. Online Login/Registration Module
2. Recording caregiver incident
3. Knowledgebase and Analytics

1. Online Login/Registration Module

The Information portal can be accessed by all parties related with the mental health related field, the concerned party or individual can register in to the system using valid information and can login in to the system based on the role provided.

Following details will be recorded for each caregiver

Caregiver profile:

individual code and year	
name of caregiver	
gender	☐ male ☐ female
age	
marital status	☐ married ☐ unmarried ☐ widow
identity card	☐ yes ☐ no ☐ not specified
district of residence	☐ kathmandu ☐ lalitpur ☐ bhaktapur ☐ other
caregiver accomodation type	☐ permanent ☐ temporary
enough space for living	☐ yes ☐ no
postal address	
phone number	
education level	1 v
current education status	☐ studying ☐ vocational training ☐ not applicable
earnings?	☐ yes ☐ no ☐ not applicable if yes, type of work? ☐ daycare staff ☐ labour work ☐ service ☐ business ☐ teacher ☐ handwork ☐ tailoring/sewing ☐ other

Number of household members Male Female Children

Relationship to the cared person ☐ Father ☐ Mother ☐ Spouse ☐ Child ☐ Other

Relationship with spouse ☐ Good ☐ Fair ☐ Not good ☐ Other

Relationship with family ☐ Good ☐ Fair ☐ Not good ☐ Other

Relationship with neighbour ☐ Good ☐ Fair ☐ Not good ☐ Other

Caring for other family member ☐ Yes ☐ No ☐ Not specified

If Yes, family member cared for ☐ Son/Daughter ☐ Aging person ☐ Husband ☐ Other

Type of health problem ☐ Reproductive health ☐ Bodyache ☐ Diabetic, BP, thyroid ☐ Multiple ☐ Other

Receiving treatment support? ☐ Yes ☐ No ☐ Not specified

Type of treatment support they are receiving ☐ Hospital, health post, clinic ☐ Home Remedy ☐ Other

Why they do not receive treatment of own health

- ☐ Not willing to get treatment
- ☐ Did not know about treatment places
- ☐ Treatment place far away from village
- ☐ No other caregiver to look after thier relative
- ☐ No money to pay for treatment
- ☐ Other

Income	0		
Reason for not working	☐ Not applicable ☐ No work available ☐ No one to take care of relative ☐ Poor health ☐ Other		
Number of family member working	1		
Other family member financial support	☐ Yes ☐ No ☐ Not Applicable		
Any training interested to undertake	☐ Daycare staff ☐ Labour work ☐ Service ☐ Business ☐ Teacher ☐ Handwork ☐ Tailoring/sewing ☐ other	Any other income to household	☐ Disability pension ☐ old age pension ☐ retirement pension ☐ widow pension ☐ income through property ☐ nothing ☐ other

Member of any community group	☐ No ☐ Yes		
Caregiver or the person they are looking after in receive of any loan / grant	☐ Yes ☐ No	If yes, amount?	0
Source of loan	☐ Project ☐ Bank ☐ Government scheme ☐ Not applicable ☐ other		
Loan purpose	☐ child treatment ☐ livelihood ☐ construction ☐ Not applicable ☐ other		

Cared for people profile:

name	
gender	☐ male ☐ female
age	
conditions	☐ cerebral palsy ☐ spastic tetraplegic ☐ hemiplegic ☐ microcephaly ☐ autism ☐ down syndrome ☐ movement, speech or learning difficulties ☐ neurological conditions ☐ other
since when?	0 v
whether earning?	☐ yes ☐ no
type of work	☐ shop ☐ not applicable ☐ other
membership of any group eg. self help group	☐ yes ☐ no

2. Recording caregiver incident

The information system can be used by the caregiver themselves or the concerned social body to record the caregiver's concerns and the issues faced by them in the workplace. These information will prove to be a vital for the caregiver as expert medical personnel associated with the system can provide effective health care measurement to the affected caregiver. This will be kind of self-assessment for caregivers.

Caregiver's wellbeing:

Caregiver name		Caregiver Code and Year	
Concerned about not having enough time to yourself		☐ A lot ☐ Quite a bit ☐ A little ☐ Not at all	
Concerned about not being able to take a break from caring		☐ A lot ☐ Quite a bit ☐ A little ☐ Not at all	
Concerned about not being able to plan for the future		☐ A lot ☐ Quite a bit ☐ A little ☐ Not at all	
Concerned about not being able to caring (because you are ill)		☐ A lot ☐ Quite a bit ☐ A little ☐ Not at all	
Concerned about strains in your relationships with friends and family because of your caring responsibilities		☐ A lot ☐ Quite a bit ☐ A little ☐ Not at all	
Concerned about drifting apart from friends and family because caring responsibilities limit the time you have to keep in contact with them		☐ A lot ☐ Quite a bit ☐ A little ☐ Not at all	
Concerned about feeling isolated because of the situation you are in		☐ A lot ☐ Quite a bit ☐ A little ☐ Not at all	
Concerned about not getting the support you need from family and friends		☐ A lot ☐ Quite a bit ☐ A little ☐ Not at all	
Concerned about your financial situation		☐ A lot ☐ Quite a bit ☐ A little ☐ Not at all	
Concerned about having to cover extra costs of caring (like trips to hospital, medication)		☐ A lot ☐ Quite a bit ☐ A little ☐ Not at all	
Concerned about own physical health		☐ A lot ☐ Quite a bit ☐ A little ☐ Not at all	
Concerned about caring role making your physical health worse		☐ A lot ☐ Quite a bit ☐ A little ☐ Not at all	
Concerned about being unable to cope with "the constant anxiety of caring"		☐ A lot ☐ Quite a bit ☐ A little ☐ Not at all	
Concerned about feeling depressed		☐ A lot ☐ Quite a bit ☐ A little ☐ Not at all	
Concerned about being unable to see anything positive in life		☐ A lot ☐ Quite a bit ☐ A little ☐ Not at all	
Concerned about lack of sleep because of worry or stress		☐ A lot ☐ Quite a bit ☐ A little ☐ Not at all	
Concerned about feeling so exhausted so you can't function properly		☐ A lot ☐ Quite a bit ☐ A little ☐ Not at all	

Caregiver's incidents or complaints form

Below will records the caregiver's incidents or complaints. As per application settings, this info will be emailed or messaged to concerned department or centers which will further handle it.

caregiver name		
caregiver code and year		
name of cared person		
cared person code and year		
date		
nature or type of compains	other	other type
your relationship to cared person	other	other type
incident (issue/needs that present with the most difficult in relation to thier caring role)		
how it affects caregiver's life and life of thier family		
solution you are seeking any ideas how to relieve the issues/needs they have identified		
supporting file (upload document)	Browse...	

Caregiver's request form

Through this form, caregiver can put request or ask any queries to helpline / help center. Caregiver usually asks for medical tool, medical contacts, medical advice, caregiving guidance etc. As per application settings, this info will be emailed or messaged to concerned department or centers which will further handle it.

Request By		Date	
Contact		Address	
Request Type	Medical tools	Priority	High
Request Details		Purpose	

Request Received By		Comment	
Request Approved By		Comment	
Request Approved Date		Comment	
Request Completed Date		Comment	
Request Rejected By		Comment	
Request Closed Date			

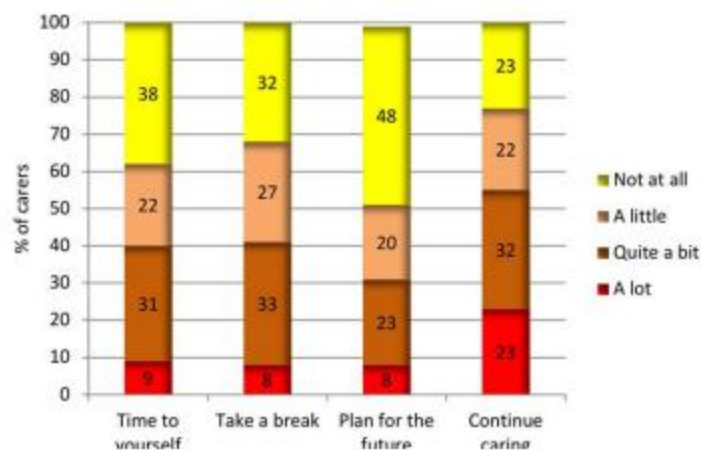

4. Knowledgebase and Analytics

As per the need of a broader ecosystem and repository of mental issues faced by the caregiver this system will ultimately create a very valuable knowledge base for the concerned medical party. It will generate invaluable analytics related with the caregiver current context.

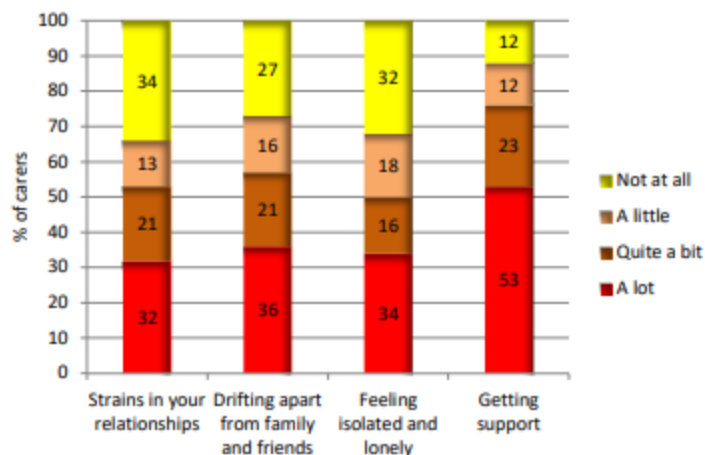

The information system will act as a Business Intelligence source of data to generate very accurate decision making for the organization, which will be beneficial for improvement of the general welfare of the caregiver who are exposed to different forms of mental health related issues.

The Analytics tracking will provide information:

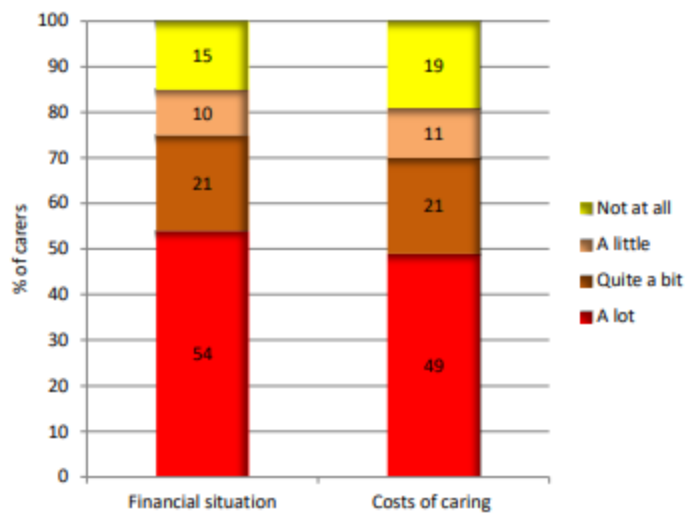

Caregiver's concern about their personal lives

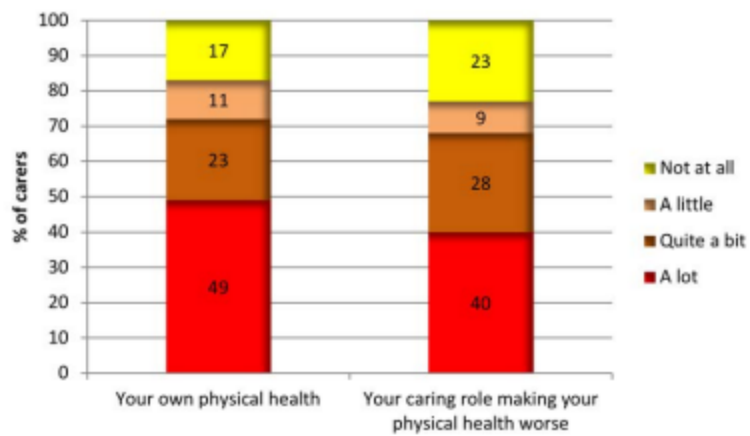

Caregiver's concern about their relationships

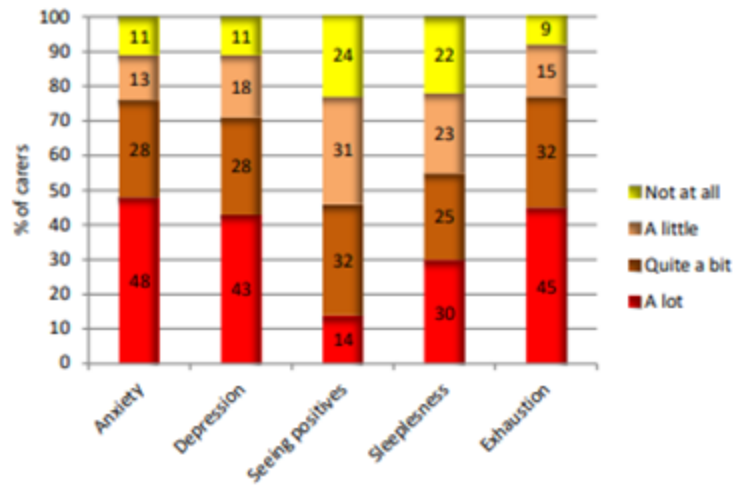

Caregiver's financial concerns

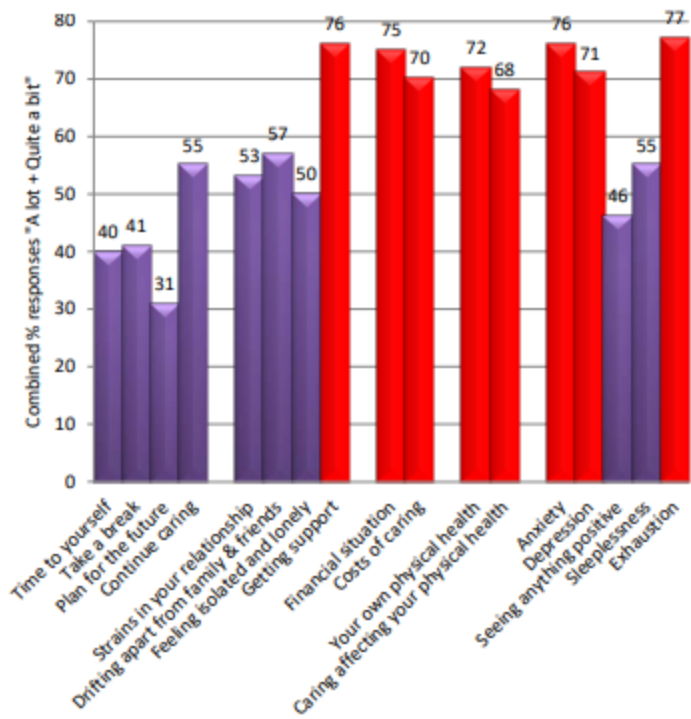

Caregiver's concern about their physical health

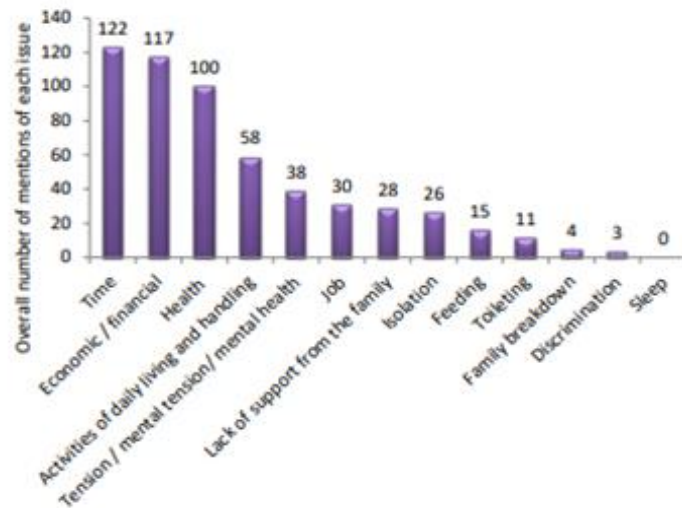

Caregiver's concern about their mental health

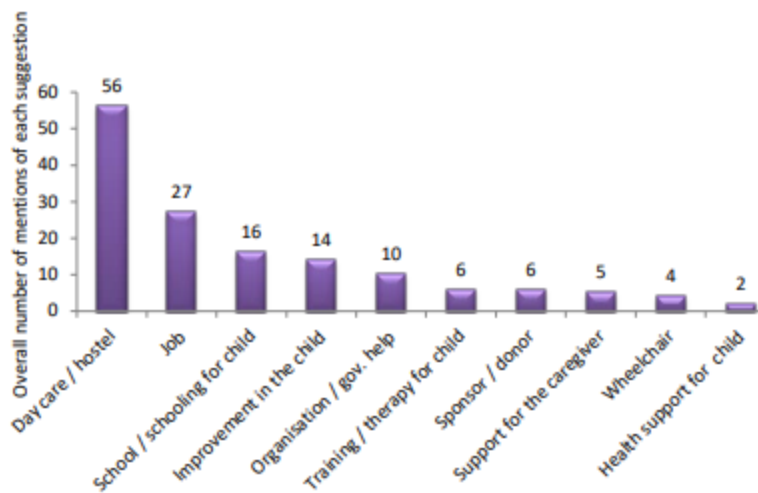

Caregiver's overall wellbeing

Caregiver's list of the issues and needs which present them with the most problem in their caring role

Caregiver's list of ideas of the things which would help relieve the difficulties and issues they identified

Future Enhancements

In next phase of development, we will modify the software to add the following

- a) Training support
- b) Medical support

Conclusion

This website portal will help to provide safety to caregivers. The Information system can be used by the researcher for further data analysis approach that help to gain valuable insight on the overall status of the caregiver on different region and eventually using the information base for knowledgebase creation.
